PROFESSIONAL SUMMARY

Results-driven Technical Support Specialist and detail-oriented Network Engineer with 3 years of experience delivering Tier 1-3 support in fast-paced IT environments. Skilled in troubleshooting hardware, software, and network issues, managing service requests, and ensuring high customer satisfaction through effective communication and problem-solving. Strong knowledge of ITIL processes, ticketing systems (ManageEngine Service Desk / Service Plus), and remote support tools. Experienced in designing, implementing, and maintaining secure, reliable network infrastructures, with practical background in Cisco and Mikrotik environments across LAN/WAN, VLAN, and wireless technologies. Proficient in configuring routers, switches, firewalls, and VPNs, monitoring network performance, and resolving connectivity issues to ensure system uptime.

CORE COMPETENCIES

- End-User Support & System Administration
- Network Troubleshooting & Configuration
- ITIL Framework & SLA Compliance
- Ticket Management & Documentation
- Active Directory & Office 365 Administration
- Routing, Switching & VPN (Cisco, Mikrotik)
- Network Security Fundamentals
- Strong Communication & Team Collaboration

TECHNICAL SKILLS

Networking: LAN/WAN, VLAN, Wireless Networking, Routing & Switching, Cisco, Mikrotik, IP Addressing & Subnetting, RIP, OSPF, EIGRP

Systems & Platforms: Windows, Linux (fundamentals), Active Directory, Office 365

Security: Firewalls, VPN (Site-to-Site & Remote Access), Network Protection Fundamentals

IT Service Management: ITIL Processes, SLA Compliance, Incident & Ticket Management, Manage Engine Service Desk / Service Plus

Tools: Manage Engine, Remote Support Tools, Microsoft Office / Office 365

PROFESSIONAL EXPERIENCE

Technical Support Engineer

Yemen Kuwait Bank | Sana’a, Yemen | March 2024 – Present

- Provide first-line technical support to end-users via phone, email, chat, and ticketing systems.
- Diagnose and troubleshoot hardware, software, and network issues efficiently.
- Log, track, and resolve incidents using ticketing tools (Manage Engine Service Plus).
- Install, configure, and maintain operating systems, applications, and peripherals.
- Set up and support VPN connections, remote desktops, and mobile devices.
- Escalate unresolved issues to Tier 2/3 support or specialized teams when necessary.
- Perform routine maintenance and updates on systems and applications.

- Ensure timely resolution of incidents within agreed Service Level Agreements (SLAs).
- Assist in software deployments, patching, and system upgrades.
- Document all support activities, known issues, and solutions for future reference.
- Continuously update technical knowledge through training and certification.

Network Engineer — Internship

NATCO – HAS | Sana'a, Yemen | October 2023 – December 2023

- Gained practical knowledge of network fundamentals, including LAN, WAN, and VLAN concepts.
- Configured and troubleshot routers, switches, and access points under supervision.
- Practiced IP addressing, subnetting, and routing protocols (RIP, OSPF, and EIGRP).
- Gained hands-on experience with Windows and Linux network configurations.
- Created and updated network documentation, including topology diagrams and IP address lists.
- Studied and applied IT security practices and network protection measures.
- Collaborated with team members to understand real-world IT infrastructure operations.

IT Assistant

Yemen Media Guide (YMGD) | Taiz, Yemen | May 2023 – August 2023

- Participated in on-call rotations and after-hours support as needed.
- Maintained IT security best practices, including antivirus management and user awareness.
- Collaborated with other IT teams to improve system reliability and user experience.
- Installed and configured computer hardware, software, systems, networks, printers, and scanners.
- Responded in a timely manner to service issues and requests.
- Repaired and replaced equipment as necessary.
- Tested new technology.
